

Kids' winged wonders take flight to aid science project

YOUNGSTERS' ideas have been taking flight at a Swansea school.

Pupils at Ynystawe Primary School have been creating their own imaginary winged creatures as part of a project on science and art.

The school has been involved in the Leonardo Effect project, set up by St Mary's University College in Belfast.

The scheme aims to show how art and science can combine, such as in the work of Leonardo da Vinci.

Head teacher Gwen Davies said: "The project has allowed children to develop a range of skills through active observation and investigation."

ART MEETS SCIENCE Ynystawe Primary School pupils Katie Jones, Tom Davies, Aidan Biddiscombe and David Williams, with one of their unusual imaginary flying creatures.
